CANDLE RACK & VAT

This 6 candle taper dipping rack will speed up your production. Dip up to 6 tapers at a time. It can be adjusted to make from 1 - 12 inch tapers. Simply attach wick to each end and dip into dipping vat.

DIRECTIONS

Use thumb screws to set height of the adjustable arms (align arms). Note that for a 12" candle, it will need to be set larger than 12" apart. Add approximately 2". Tie wick to a lower arm. Wind wick onto frame, going straight up, over one arm, straight down, over the next arm, etc... keeping slack out.

When you reach the final arm, tie off the wick while maintaining tension on it. Trim excess wick. Prepare all frames in this manner.
