

### **PROPOLIS TRAP INSTRUCTIONS**

1. The propolis trap is used to collect propolis for home or retail use.
2. Place trap on top of uppermost box on your hive.
3. Place trap with V shaped slot facing down towards the frames of the super or hive body.
4. Place the inner cover and telescoping cover over the propolis trap.
5. Leave until the slots are filled with propolis.
6. Place trap in freezer leave for approximately 8 hours or until chilled completely through.
7. Remove trap from freezer and the trap will flex and most of the propolis should pop out.
8. Place trap back in hive and repeat.
